No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       Score

```

much better inhibitor of papain and dipeption

```
N,Alternate names: cysteine proteinase inhibitor
C,Species: Oncorhynchus keta (chum salmon)
C;Date: 14-Jul-1994 #sequence_revision 14-Jul-1994 #text_change 16-Jul-1999
C;Accession: JC2040
R;Koide, Y:, Noso, T.
Biosci. Biotechnol. Biochem. 58, 164-169, 1994
A,Title: The complete amino acid sequence of pituitary cystatin from chum salmon
A;Reference number: JC2040; MUID:94162738; PMID:7764512
A;Accession: JC2040
A;Molecule type: protein
A;Residues: 1-111 <KOI>
C;Comment: The intracellular role of this protein is the inhibition of intralyse
C;Superfamily: cystatin; cystatin homology
C;Keywords: cystatin; cystatin homology <CYS>
F;48-52/Region: inhibitory
F;89-109/Disulfide bonds: #status experimental

"Generation and initial analysis of more than 15,000 full-length
RT Human and mouse cDNA sequences.";

Proc. Natl. Acad. Sci. U.S.A. 99:16903(2002).

1. "FUNCTION: As an inhibitor of cysteine proteinases, this protein is
controlled to serve an important physiological role as a local
controllator of this enzyme activity.
